Content + Shedule Festival June 24th to June 28th + July 1st to July 5th

Are you ready to allow the new you to come out and play in our new world? Things have changed with us personally and globally in a huge way. As much as this process started some time ago, 2020 has been quite remarkable in many ways and in a way, it seems very much just the beginning.

We cannot deny that 2020 has been an intensely impactful year for many people. Besides things changing globally, many of us have been experiencing what people would refer to as a roller coaster ride involving intense emotions while witnessing a complete breakdown of how our world operates. We are certainly different, and so is the world; therefore, learning how to play the game of life in a completely different way is upon us. We are now observing what may have worked before is no longer applicable. We'll have to step out of our comfort zone and old way of life to embrace our New World.

On the surface, it may seem that what is happening is a breakdown of our world and society. However, what we are going through is a transformation and upgrade in our human experience and world. We have a tremendous opportunity to make a huge leap forward. Many of us have been waiting for this time to come forth. Here we are, it is up to us individually and collectively to direct our experience and world.

The energies coming through have been aiding us and propelling us forward individually and collectively, preparing us for the next stage of this shift in consciousness. Yes, a shift in consciousness is what is fuelling this transformation. It may seem overwhelming the speed things are shifting and moving along; however, this is the most exciting time in our human history!

Our internal directive now is for us to make decisions and choices from our higher perspective and create intentionally from a higher understanding and knowing. If there has ever been a time to really step things up in our life and on our playground, we call earth; this is it.

Most of us are bogged down with heavy inverted 3D and 2D programming, obscuring us from a clear view of our True Nature. We have very much been run by programs, conditioning and the collective projection of life. The need to be able to rise above our ego programming and operating system and reclaim our place in the driver's seat and create from an empowered position is vital right now. Are you ready to rise above and be an active creator of your own life and the collective experience? If so, join us for this highly transformative workshop we have put together!

This 3-day workshop will involve a preparation process at the beginning and a wrap up at the end. Franco & Marco will be taking you on a journey of self-discovery to assist you in Embracing and Mastering your true essence, releasing and clearing that, which no longer serves you and open you up to an expanded way of life.

Musician and composer Marco Missinato will be infusing the workshop with his high-frequency music tuned to the work we will be doing, and Marco will share his insights as to how music can play an integral role in your soul's journey!

This 3-day workshop will facilitate an experience of connection, recognition and liberation! Together Franco and Marco will be offering tools to help you reveal the truth of your soul's journey and access the vision and focus on creating a 5th-dimensional human experience.

Some of what will be covered during the workshop:

- A look at the changes we are currently going through, why and what it is offering us.
